Ranked Microbial Metabolic Pathways Across Cohort
Fermentation & SCFA Production
Vitamins & Cofactors Biosynthesis (B12, Folate)
Butyrate Synthesis (Gut Homeostasis)
Complex Polysaccharide / Fiber Degradation
Hydrogen & Methane Metabolism
Bile Acid Transformation & Deconjugation
Acetate & Propionate Production
Lipid & Fatty Acid Metabolism
Protein & Amino Acid Catabolism
Lactate Utilization & Secondary Fermentation
Urease Activity & Nitrogen Recirculation
Aerotolerance & Microaerophilic Respiration
Mucus Degradation & Barrier Function
Sulfate Reduction & Sulfur Cycling
