Predicted Microbial Functional & Metabolic Potential
log10(Predicted Potential % + 0.1)
1
0
−1
Fermentation & SCFA Production
Bile Acid Transformation & Deconjugation
Hydrogen & Methane Metabolism
Complex Polysaccharide / Fiber Degradation
Butyrate Synthesis (Gut Homeostasis)
Vitamins & Cofactors Biosynthesis (B12, Folate)
Acetate & Propionate Production
Protein & Amino Acid Catabolism
Lipid & Fatty Acid Metabolism
Lactate Utilization & Secondary Fermentation
Aerotolerance & Microaerophilic Respiration
Urease Activity & Nitrogen Recirculation
Mucus Degradation & Barrier Function
Sulfate Reduction & Sulfur Cycling
